Introduction

Most professionals run many marathons in a lifetime. As teachers, we run a marathon every day. And while we do the many things we do, step-by-step, we aim at getting better every year.

But you know what separates the best marathon runners from other runners in a real physical marathon, it's their strength and stamina. And just as athletes need to monitor their progress, we, as teaching professionals, need to monitor ours. We create opportunities of assessment for growth and learning for millions of students, but when do we get the time and resources to assess ourselves? Well, the International Teachers' Olympiad (ITO) is your personal assessment tool and guide.

By taking the ITO, you have already taken the first step towards discovering your strengths and improvement areas. And for that, you have earned your first reward - a detailed report about your teaching knowledge and skills.

Now, before you check your report, remember that just as athletes have a goal in mind for their performance and results, you too must have a goal. This could include being in the Top 100, Top 10 or better still, being the Winner this time or in the next year's Olympiad.

Whatever you find in this year's report is only a starting point, whether you are in the Top 100 or the Top 10,000. And you, my friend, have just started your journey towards transformation. It takes courage and a lot of confidence to decide to start this journey and then show up on the day of the assessment. You know what, you did it and did it well.

Congratulations for participating in the International Teachers' Olympiad 2023!

This, indeed, is a commendable step on your part and you must give yourself a pat on the back!

Did you know you just helped create history?!

Teachers from across cities, states, countries took the International Teachers' Olympiad 2023 to measure their teaching skills and knowledge.

Figure 1: Global Participation - Teachers from 72 countries participated

Note: Map used above is just for reference and does not represent actual geographical borders.

About this Report

So, you have taken the assessment but what is the fuss about this report?

Short Answer

It maps teachers' skills to their dreams and helps achieve them.

Long Answer

Taking an assessment is never easy; we worry about how we perform – good, bad, or just adequate. We feel underprepared and vulnerable. But that's just a perception. In reality, assessment is the only way to know about and build an achievable target for oneself.

The primary function of this report is to help you understand yourself and your growth pathway. Now, we recognise that to achieve any success, we need expert support and guidance. Good news, this assessment has been built by a community that is a strong powerhouse of experts and mentors who are committed to supporting teachers at all levels.

Please remember, this report is a testimony of your commitment to self-development, and we aspire to keep it confidential. We have shared this report only with you on your registered communication channels, and the decision to share it with anyone else will be yours and only yours.

Your guide for professional fitness & growth

Consider this report as your pedagogy health check report. Just like a body health check report gives you information on your vitals and areas that need immediate attention for a healthy body, this report gives information on your teaching vitals, skills you excel at and the skills you need to improve.

This report categorises your teaching health into six domains of teaching. It contains information about your current level of knowledge and skills in each of these domains and includes recommendations that will help you move up to the next level.

We strongly recommend you DO NOT READ this report. Okay, to be precise, we don't want you to just read this report and forget about it. This report has the capability to be your guide and mentor and to help you not just develop your skills but also showcase them to your school and the society. We are ready to help you succeed.

Are you ready?

How to Use This Report

The International Teachers' Olympiad report sets the ball rolling by creating an opportunity for you to assess your own skills and receive personalised recommendations on how to improve. To make optimum use of this report, you must use it to:

Identify Your Strengths

Recognise the domains where you excel and can serve as a mentor or leader in your educational community.

Recognise Your Areas for Growth

Acknowledge domains where you may require further development and targeted improvement.

Set Specific Goals

Establish clear and achievable goals for improvement in each domain, setting a roadmap for your professional growth.

Invest Time and Effort in Your Training and Development

Seek opportunities for further training, workshops, and courses that can enhance your skills and knowledge.

Build a Network

Collaborate with colleagues to share best practices, insights, and experiences, creating a collective learning environment.

By following these recommendations, you can create a tailored growth pathway to continually improve your pedagogical skills.

Decoding the International Teachers' Olympiad 2023

Your test result provides the baseline for your current performance levels. Upon this, we have built a step-by-step growth plan and suggested resources and activities that will help you achieve the next milestone.

About the test:

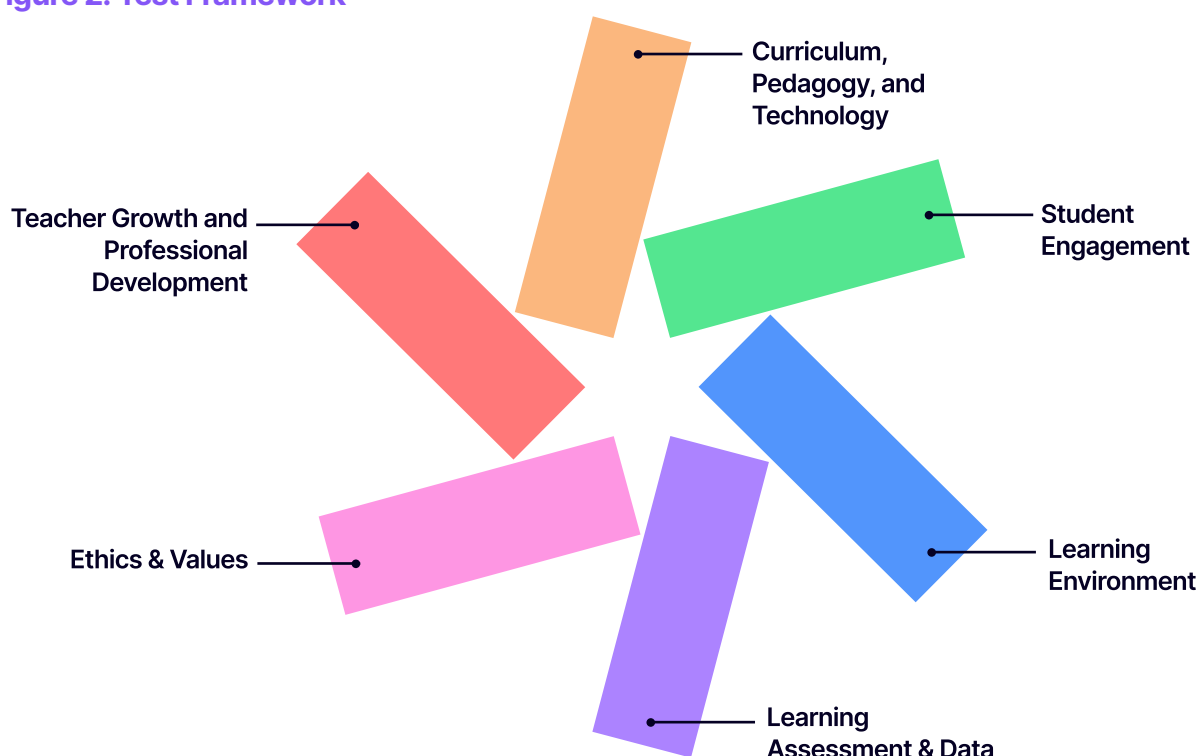

It is mapped with core teaching skills identified across national and international standards.

It has 50 multiple-choice items to assess core teaching skills.

It is an online test for 60 mins. and can be accessed on the laptop or mobile device.

It is comprised of test items that have been checked for validity and fairness.

Figure 2: Test Framework

International Teachers' Olympiad Framework

The ITO measures teachers' knowledge and skills** in the following 6 domains:

Curriculum, Pedagogy and Technology

This domain is comprised of the three components - curriculum (what to teach), pedagogy (how to teach) and technology and their integration to improve teaching and learning. Good teaching requires teachers to be skilled in the integration of subject curriculum with the appropriate pedagogy and technology for achieving desired learning outcomes.

Student Engagement

This domain includes the teaching and learning strategies that can be used to gain students' attention, intrigue them and trigger optimism and interest in them to become active learners. Outstanding teachers create learning experiences that engage diverse learners with varied interests and needs.

Learning Environment

This domain refers to the physical, social, emotional and intellectual opportunities that are provided to the learner to enable impactful and successful learning. Great teachers ensure that they create and sustain a positive learning environment.

Learning Assessment & Data

This domain consists of assessment in its various forms, intended for varied purposes and the assessment data collected as evidence and as a tool to support teaching and learning. Outstanding teachers create quality assessments and use the assessment data to support students in achieving their learning goals.

Ethics & Values

This domain is comprised of two concepts- ethics, that are the guidelines that govern an educator's conduct, and values, that are the principles that inform the moral decisions to be made. Great teachers are role models whose ethics and behaviour inspire students to become responsible and productive citizens.

Teacher Growth and Professional Development

This domain refers to the activities undertaken by educators to ensure improvement in knowledge, skills, abilities and attitude and to assure career growth. Exceptional teachers continually seek to learn new skills, support their peers, grow in their careers and share their own learnings with others.

**We have referenced the teaching standards from Australia, the USA, the UK, the UAE, and India.

Understanding the Result

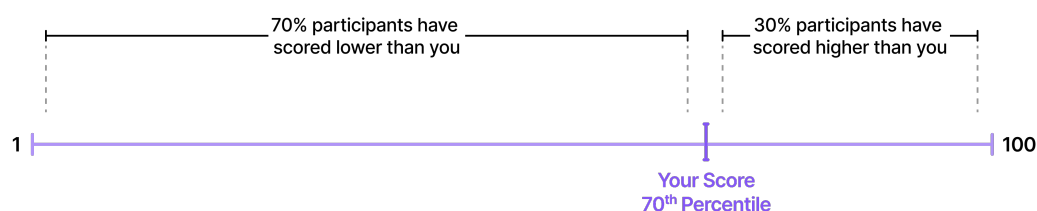

The result is a comparison of your score with other participants' scores. To generate this result, the scores of all participants are ranked in descending order. On a scale of 1-100, every participant's performance gets a percentile rank.

What percentile rank means?

We'll understand this with an example:

Let's say, you obtain 70th percentile in the Olympiad. This means that you scored higher than 70% of the participants and 30% of the participants scored higher than you.

Figure 3: Percentile Representation

Earn an Excellence Badge!

Scoring among the top 30% will definitely get you one of these Excellence Badges.

Interpreting Your Result

It's interesting to see where you stand against your peers globally, right? Either you are pleasantly surprised or critically shocked. Whatever it is, it should be a strong enough stimulus for you to find out more about yourself and your performance.

This representation showcases your performance on the six critical domains of teaching and learning against the performance of your peers. These results were obtained using data science models and algorithms.

Domain Profile for Jordan Steven Son

The International Teachers' Olympiad assessed teachers on 6 domains.

Your performance in the 6 domains is listed from highest to lowest.

Performance Summary

Your current performance suggests that your next growth target is to reach the 95th percentile on the international standards.

To help you achieve this target, you must know more about your current performance. Your overall performance in all the six domains is explained in the paragraphs below. You will receive a detailed report on each domain separately, along with the list of resources to build your skills further.

Domain 1: Curriculum, Pedagogy and Technology

Your percentile score indicates that you can integrate technology with curriculum content and teaching strategies. This leads to effective teaching and learning in your classroom, enabling the learners to achieve the learning outcomes.

Domain 2: Student Engagement

Your percentile score indicates that you understand the concept of student engagement. This knowledge helps you describe the importance of creating effective lesson plans to address varied interests and needs of your learners.

Domain 3: Learning Environment

Your percentile score indicates that you are able to create an active learning environment that demonstrates exemplary teaching and learning practices. It also suggests that you can manage the physical, social, emotional, and intellectual components of a classroom successfully to sustain the positive learning environment.

Domain 4: Learning Assessment & Data

Your percentile score indicates that you have a fair understanding of the purpose of various types of assessments and the use of assessment data to improve outcomes. This understanding can help you ensure student progress, achieve learner outcomes and modify/adapt your teaching plans.

Domain 5: Ethics & Values

Your percentile score indicates that you always act as a responsible teacher and abide by the rules and regulations of your educational institution. It also suggests that you are a thorough professional and value the standards of an educational institution.

Domain 6: Teacher Growth and Professional Development

Your percentile score indicates that you have an understanding of the importance of engaging in reflective practices and activities that enable you to grow in your teaching career. You can use this understanding to explore various teacher-development activities that can ensure your growth and development as a teacher.

Domain 1 Performance

Curriculum, Pedagogy and Technology

Understanding Curriculum, Pedagogy and Technology

This domain is comprised of the three components - curriculum (what to teach), pedagogy (how to teach) and technology and their integration to improve teaching and learning.

Good teaching requires teachers to be skilled in the integration of curriculum with appropriate pedagogy and technology for achieving desired learning outcomes that develop students' personalities as much as their knowledge and skills.

Domain 1 covers the following teacher skills:

Apply knowledge of learning theories, instructional strategies and learning taxonomies in creating lesson plans.

Employ a range of teaching theories and strategies to develop critical and creative thinking, as well as, other higher-order thinking skills.

Understand key child development theories and apply them to create learning experiences that facilitate learners' personality development and growth.

Understand types of curriculum, its planning and progression; and design learning experiences to achieve curricular goals as per the curriculum framework.

Keep up-to-date with technological developments in education and integrate ed-tech tools that engage students and are easily accessible and available to them.

Select resources and design learning experiences to achieve curricular goals as per the curriculum framework.

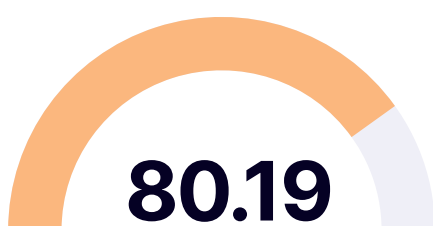

Performance Evaluation

You are placed at the 80.19 percentile on the global level in this domain.

Figure 13.2: Comparison Group - Senior Secondary (11th - 12th)

Your percentile

Your performance is better than 55.56% of the teachers who participated from Bangalore City within the category 'Senior Secondary (11th - 12th)'.

Domain 2 Performance

Student Engagement

Understanding Student Engagement

This domain includes the teaching and learning strategies that can be used to gain students' attention, intrigue them and trigger optimism and interest in them to become active learners.

Outstanding teachers create learning experiences that engage diverse learners with varied interests and needs.

Domain 2 covers the following teacher skills:

Understand the process of developing an effective lesson plan that engages learners in the teaching and learning process.

Design activities for each lesson plan component effectively in order to ensure learner engagement at every step of the lesson.

Apply the principles of differentiation to plan productive lessons that differentiate various aspects to address the needs of all learners.

Create inter-disciplinary lesson plan to engage learners effectively and make learning relevant and useful for them.

Use different types of lesson sequencing to design inter-disciplinary lessons that follow a logical and objective sequence to create impactful learning.

Deliver discipline-specific lessons impactfully to ensure student engagement using effective delivery techniques.

Performance Evaluation

You are placed at the 65.18 percentile on the global level in this domain.

Domain 3 Performance

Learning Environment

Understanding Learning Environment

This domain refers to the physical, social, emotional and intellectual opportunities that are provided to the learner to enable impactful and successful learning.

Great teachers ensure that they create and sustain a positive learning environment.

Domain 3 covers the following teacher skills:

Understand how the physical setting of a classroom (the aesthetics, organisation, and function of each area) influences student learning and behaviour.

Develop a variety of skills and techniques to keep students organised, orderly, focussed, attentive, on task, and academically productive during a class.

Create an intellectually stimulating learning environment that reflects children's emerging interests and enables them to direct their own learning.

Appreciate the role of daily predictable schedules and collaboratively developed rules and routines in enabling children to better manage themselves and their relationships.

Encourage constructive social behaviour, positive attitude and expressions, respectful and fair treatment of students.

Develop dispute resolution strategies in students and encourage them to develop higher-order thinking skills through critical reflection.

Performance Evaluation

You are placed at the 99.99 percentile on the global level in this domain.

Domain 4 Performance

Learning Assessment & Data

Understanding Learning Assessment & Data

This domain consists of assessment in its various forms, intended for varied purposes and the assessment data collected as evidence and as a tool to support teaching and learning.

Outstanding teachers create quality assessments and use the assessment data to support students in achieving their learning goals.

Domain 4 covers the following teacher skills:

Understand the purpose of assessment and correctly identify assessment needs to improve learning outcome achievement.

Use different types of assessment appropriately before, during and after a lesson.

Design varied classroom assessments activities that meet assessment requirements effectively.

Interpret formal and informal assessment data to inform teaching and learning and to improve outcome achievement.

Use a variety of assessment techniques to monitor student learning and gauge the effectiveness classroom instruction.

Performance Evaluation

You are placed at the 65.1 percentile on the global level in this domain.

Domain 6 Performance

Teacher Growth and Professional Development

Understanding Teacher Growth and Professional Development

This domain refers to the activities undertaken by educators to ensure improvement in knowledge, skills, abilities and attitude and to assure career growth.

Exceptional teachers continually seek to learn new skills, support their peers, grow in their careers and share their own learnings with others.

Domain 6 covers the following teacher skills:

Create a professional development plan that leads to teacher growth and development.

Engage with collaborative professional learning communities to analyse and improve teaching and learning practices.

Participate in relevant developmental activities to stay up-to-date with the latest developments in curriculum, pedagogy and technology.

Plan professional development activities that help in addressing and meeting the learning needs of a diverse class.

Develop reflective thinking skills to assess own professional strengths and areas for development.

Performance Evaluation

You are placed at the 54.73 percentile on the global level in this domain.

The Six-Domain Development Plan

This six-domain development plan is your six-month pathway to achieving excellence in teaching and learning. Your development plan is built on international teaching standards and provides a well-designed, teacher-friendly pathway to professional growth.

We cover one domain each month for the next six months where we will share your detailed report on the domain scheduled for the month.

Here's what you need to do. Read your report carefully, identify your strengths and development areas and begin working on them diligently. It would be a good idea to work on one domain each month and then take next step. Take your first first step right now.

Suraasa Way to Teacher Excellence

Suraasa, the source of knowledge, is an international education and research organisation focussed on teacher empowerment and growth. Our unique approach to education reform is based on teacher-success principles. We believe that education systems can evolve only when the top teachers of the world are able to get the growth and recognition they deserve. These top teachers would become the role models and torch bearers of 21st century education and will be able to attract the right human potential to the teaching domain. These top teachers will shape up the teaching and learning principles globally and will define what education should ideally look like. These top teachers will make students fall in love with learning, every day, everywhere.

At Suraasa, we have envisioned a global community of these highly skilled teachers who are known for their expertise, skills and passion to educate. We create opportunities to identify, nurture and honour every single teacher who has the potential to be one of the world's top 5% teachers. We believe, everyone can experience excellence and only a few can exhibit it. We work tirelessly to create opportunities for teachers to move from just experiencing to experiencing and exhibiting excellence in all domains of life.

To turn this vision into a reality, Suraasa manages multiple high impact teacher empowerment and growth assets like International Teachers' Olympiad (ITO), Teacher Impact Awards (TIA), Professional Graduate Certificate in Teaching and Learning (PgCTL), Diploma in Teaching (DiT), Professional Graduate Certificate in Education (PgCE), among many others. The team has worked with teachers from over 40 nationalities and helped them achieve their dreams of more successful and impactful teaching careers. The bottom line is that the aim of our very existence is to help every deserving teacher reach their #TrueTeachingPotential.

Empowering Teachers. Forever.

International Teachers University

International Teachers University (ITU) is a U.S. based institution that is exclusively devoted to providing world-class education to highly effective teachers and teaching aspirants. The institution's mission is to empower teachers with the essential skills needed to advance their careers and excel in today's and tomorrow's classrooms.

ITU's Master's in Education (M.Ed.) program, approved by the Higher Education Licensure Commission in the District of Columbia, embodies the institution's dedication to teachers' career advancement. Grounded in first-principle thinking, it equips teachers to adapt seamlessly, ensuring their relevance and effectiveness in diverse educational settings.

The program connects teachers from diverse backgrounds, promoting cultural understanding and collaborative learning. Delivered by experienced international faculty, the curriculum is meticulously crafted through extensive research into global education systems. It offers a 21st-century pedagogy that transcends subjects and curricula, making graduates' expertise universally applicable and globally competitive.

ITU serves as a pioneering platform where graduates transform into

Academic Leaders

School Boards

Impactful Mentors

Visionary Innovators

To support and recognize passionate teachers like you, ITU proudly offers a scholarship grant to the **Top 800 participants** of the International Teachers' Olympiad. This scholarship offers a **\$1,200** grant towards admission into ITU's M.Ed. program.

Contact ITU's Admission Team

For further details, you are requested to contact ITU's admissions team by filling up the form [here](#) or by scanning the QR code.
